Способ получения: Самовывоз	
Адрес склада: г Ростов-на-Дону, ул Береговая, д 67, офис 307	

The Semigorye Pipeline Cleaning and Diagnostics Center is a Russian company whose main activity is the development and production of cleaning pistons for pipelines and piston detection devices.

In April 1988, by order of the Ministry of Construction of Oil and Gas Industry Enterprises (Minnetgazstroy) of the USSR, the Eastern Branch of the All-Union Research Institute for the Construction of Main Pipelines (VNIIST) was established in Ufa for the scientific and technical support of pipeline construction in the Urals, Western and Eastern Siberia, and the Far East.

During the reorganization, at the beginning of the 21st century, a holding was formed from independent companies, each of which is engaged in its own direction. The central company of the holding is the "Center for cleaning and diagnostics of pipelines "Semigorye".
